REMARKS

The last Office Action has been carefully considered.

In the Office Action the Examiner indicated that the claims were rejected under 35 U.S.C. 102(a) or 102(e) as being anticipated by U.S. patent no. 6,514,131 to Reich, et al.

In the response to the argument, the Examiner further indicated that from the submitted evidence it was not clear that the invention disclosed by not claimed by the U.S. patent to Reich was the work of the applicants of the pending application.

With the present communication, applicants have submitted a Declaration confirming that the inventors are applicants of the pending application serial no. 10/517,417, and they are the inventors of the subject matter thereof, and any invention disclosed but not claimed in the reference was derived from the inventors of this application and thus was not the invention "by another".

Also, a new document confirming the facts disclosed in this Declaration is submitted herewith as well. This document is inventors' in-

house report. The document is accompanied by translation from German into English.

It is therefore believed that the rejection of the original claims as being anticipated by the reference should be considered as no longer tenable and should be withdrawn.

As for the obviousness rejection, it is respectfully submitted that the new features of the present invention which are now defined in the claims can not be as obvious from the applied references.

Applicants have also submitted claim 11 as second independent claim. This claim defines an additional feature (mouth 23 situated close to a rear housing wall 152) which is not disclosed in the prior art applied by the Examiner.

It is respectfully submitted that the claims currently on file should be considered as patentably distinguishing over the art and should be allowed.

Reconsideration and allowance of the present application is most respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal respects in order to place this case in condition for final allowance, then it is respectfully requested that such amendments or corrections be carried out by Examiner's Amendment, and the case be passed to issue. Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance; he is invited to telephone the undersigned (at 631-549-4700).

Respectfully submitted,

Michael J. Striker  
Attorney for Applicants  
Reg. No. 27233
